

Bringing Transportation Training to You

Building Skills and Expertise for Safe and Well-Maintained Tribal Roads

Maintenance and Operations Training

Pocatello, Idaho

Constructing and preserving a road's surface, shoulders, roadsides and structures, as well as keeping work zones safe, are key components of a safe, resilient and efficient tribal roadway system. A comprehensive approach to constructing and managing these assets includes maintenance of asphalt, gravel, bridges, pipes, guardrails, signs and right-of-ways, as well as traffic-control to ensure safe and efficient traffic flow.
